DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1, 14, 25, and 26 have been considered but are most in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 4-6, 15-17, and 27-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 4. Regarding claims 4, 15, and 27 the meaning of the phrase "retrieving from said one or more subnetwork objects an indication of the one or more network objects" is unclear.

 Specifically, it is not clear where in the mapping function these methods would be enacted.
- 5. Claims 5, 6, 16, 17, 28, and 29 are rejected because they are dependent on claims 4, 15, and 27. If the 35USC 112 rejection is overcome, these claims would be objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2153

7. Claims 1, 7-14, 18-26, and 30-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Pitkin et al. (USPN 5,341,477).

- 8. Regarding claims 1, 14, 25, and 26, Pitkin et al. (USPN 5,341,477) teach a system for controlling system traffic of a clustered computing environment with means for:
 - a. Mapping one or more node addresses, for a service to be provided, to one or more network objects defined for the service wherein the mapping of a node address comprises performing one or more operations on the node address to locate a particular network object of a plurality of network objects, the particular network object corresponding to the node address and including a network priority assigned to the node address for the service to be provided, the network priority indicating an order of preference for using one network over another network to access the service (column 2, lines 42-47; column 3, lines 3-8; column 6, lines 39-42, 61-65; column 10, lines 20-27). Note that the client accesses the broker via an address and then an operation is performed to provide a provider server address.
 - b. Obtaining from the one or more network objects, one or more network
 priorities of the service (column 2, lines 42-47; column 3, lines 3-8; column 6,
 lines 39-42, 61-65; column 10, lines 20-27).
 - c. Contacting the service based on the one or more network priorities (column 2, lines 42-47; column 3, lines 3-8; column 6, lines 39-42, 61-65; column 10, lines 20-27).

Application/Control Number: 09/583,849 Page 4

Art Unit: 2153

9. Regarding claims 7, 18, and 30, Pitkin et al. (USPN 5,341,477) teach all the limitations as applied to claims 1, 14, and 26, respectively. They further teach means for ordering the one or more priorities (column 6, lines 61-65).

- 10. Regarding claims 8, 19, and 31, Pitkin et al. (USPN 5,341,477) teach all the limitations as applied to claims 1, 14, and 26, respectively. They further teach means wherein the service comprises a system registry (column 6, lines 39-42).
- Regarding claims 9, 20, and 32, Pitkin et al. (USPN 5,341,477) teach all the limitations as applied to claims 1, 14, and 26, respectively. They further teach means wherein a network object of the one or more network objects is associated with one or more subnetworks, and a subnetwork of the one or more subnetworks is associated with one or more nodes having one or more node addresses (column 2, lines 42-47; column 3, lines 3-8; column 6, lines 39-42, 61-65; column 10, lines 20-27).
- Regarding claims 10, 21, and 33, Pitkin et al. (USPN 5,341,477) teach all the limitations as applied to claims 1, 14, and 26, respectively. They further teach means wherein the traffic for the service is restricted to one or more networks specified for that service (column 2, lines 42-47; column 3, lines 3-8; column 6, lines 39-42, 61-65; column 10, lines 20-27).
- Regarding claims 11, 22, and 34, Pitkin et al. (USPN 5,341,477) teach all the limitations as applied to claims 1, 14, and 26, respectively. They further teach means for obtaining the one or more node addresses (column 2, lines 42-47; column 3, lines 3-8; column 6, lines 39-42, 61-65; column 10, lines 20-27).
- 14. Regarding claims 12, 23, and 35, Pitkin et al. (USPN 5,341,477) teach all the limitations as applied to claims 11, 22, and 34. They further teach means wherein the obtaining is

Application/Control Number: 09/583,849

Art Unit: 2153

dependent on the service to be provided (column 2, lines 42-47; column 3, lines 3-8; column 6, lines 39-42, 61-65; column 10, lines 20-27).

15. Regarding claims 13, 24, and 36, Pitkin et al. (USPN 5,341,477) teach all the limitations as applied to claims 11, 22, and 34, respectively. They further teach means wherein the service comprises a system registry service, and the obtaining comprises obtaining the one or more node addresses from a local configuration (column 6, lines 39-42).

Conclusion

- 16. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please see the following:
 - a. Page et al. (USPN 5,329,619)

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Parton whose telephone number is (703)306-0543. The examiner can normally be reached on M-F 8:00AM - 4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenton Burgess can be reached on (703)305-4792. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
